HEALTHY  
CLEAN  
WORKPLACES

“Think about how quickly dust builds up on a tabletop or a shelf – that same dust is also settling on your upholstery and carpets.

We use the latest hot water extraction machines that deep clean the carpet and remove stains without damaging the fibres.”

**Our Carpet Care operators attend specialised training courses to make them experts in carpet cleaning and stain removal. They use the latest portable hot water extraction equipment to guarantee a great result.**

### Comprehensive cleaning process

We pre-inspect, vacuum and identify the type of carpet to determine how the fibre reacts to moisture, chemicals and temperature. Hot water extraction removes dirt and stains without damaging the carpet or leaving a detergent residue behind, which will attract fresh dirt.

### Upholstery cleaning

Office chairs with fabric coverings should be cleaned annually, to ensure they remain clean and presentable. We also wipe down the chair bases, to keep them looking nice.

### Stain removal

Spills, coffee stains and accidents can be promptly cleaned up by our call-out service.

### Scheduled maintenance

We provide scheduled maintenance services so carpeted areas are regularly cleaned every 3, 6 or 12 months.

Cleaning your carpets at regular intervals will prolong the life of your carpet.

This Carpet Cleaning service meets the strict environmental criteria as set by Environmental Choice NZ.

Cleaning Services  
Licence No. 4517141

We deploy 'Safe Systems of Work' for each service that our personnel carry out.

Our Carpet Care operators receive advanced training to ensure they deliver a quality result.
