

# Hard Floor Cleaning and Maintenance

**Polishing and restoring your hard floor surfaces is a specialised service. You can count on CrestClean's well-trained operators to bring back the shine.**

We use the latest high-tech polishing pads and professional strength polishes to restore a gloss shine to all types of floors.

Our Hard Floor Care operators have attended specialised training workshops and have years of experience in their trade. We can clean and restore all types of floors to achieve a durable non-slip finish, using processes tailored to each floor type.

We offer cleaning and maintenance plans to suit your premises.

## Our services include:

- ✔ Stripping, sealing and polishing of vinyl floors
- ✔ Burnishing and restoration of dull and scuffed vinyl floors
- ✔ Machine scrubbing of tiles, stone and polished concrete
- ✔ Laminate and wooden floor cleaning
- ✔ Environmentally Responsible processes
- ✔ Hard Floor Care maintenance plans

# Let CrestClean add a shine to your floor

Before

After

**An old floor can shine like a mirror... we can transform your premises – all it takes is skill, patience and a clear run after hours!**

## Professional strength polish lasts longer

Our operators use the latest equipment and processes. Stripping removes ingrained dirt and old polish. We apply multiple coats of high-quality polish to create a durable finish with a longer-lasting shine.

## Environmentally Responsible floor cleaning

High-tech microfibre mops will clean your floors without the need for chemicals. New extra-wide dry mops clean large floors economically. For soiled areas we use microfibre mops and Environmental Choice licensed chemicals to create cleaner floors.

This Hard Floor cleaning service meets the strict environmental criteria as set by Environmental Choice NZ.

We deploy 'Safe Systems of Work' for each service that our personnel carry out.

Our Hard Floor Care operators receive advanced training to ensure they deliver a quality result.

## Floor restoration and maintenance plans

Surfaces in poor condition can be carefully restored. High-traffic areas can have periodic reapplication of protective polish and machine buffing to bring back the shine.

Our ongoing maintenance plans keep your floors in great condition and extend the life of the flooring surfaces.
